

HYMAX GRIP® Cut-In Sleeve

The first transition coupling that can connect to a mechanical joint while restraining plain pipe with only one bolt to tighten!

Designed to connect valves and hydrants with a mechanical joint to a restrained plain pipe (3"-12")

Connects and Restrains

- Transitions from mechanical joint to plain-end pipe
- Reduces hardware requirements
- No need for thrust blocks or restraining rods

Easy to Install

- Saves time in the ditch with fewer bolts
- One piece stab-on design
- Extra length accommodates different lay-lengths of valves/hydrants

Dynamic Deflection

- Allows 4° of continuous pipe movement (per grip end)
- Reduces strain on valve and hydrant connection

HYMAX®

Repair the past. Connect the future.
